

Vanja Banićević MD **Specialist in Dermato-venereology**

Vanja Banicevic has graduated on the Medical Faculty in Belgrade, Serbia and she did her specialisation on the Clinical Centre in Belgrade, one of the most famous medical venues in the region. She is currently the only **Specialist in Dermatovenereology** in Montenegro, as well as one among the few in the region, who mastered the medical procedures in **Mesotherapy** and **Lipolysis**. She passed the exam in these fields in Paris,

with the famous Jacques Le Coz, considered one of the founders and pioneers in these fields. She was participant on plenty of the conferences world wide, when it is up to dermatology and anti-aging educations.

DERMATOVENEREOLOGY is branch in medicine that deals with the study and treatment of diseases of the skin, hair, nails and mucous membranes, the treatment of sexually transmitted diseases (STDs). Cosmetic Dermatology engaged also beauty of the skin and subcutaneous tissue. For the diagnosis and treatment of diseases of the skin, hair, nails, mucous membranes and sexually transmitted diseases Medical Centar Budva applies the latest scientific knowledge.

MD Vanja Banicevic has a certificate to operate on the **Laser Candela Gentle Max Pro**, which is the most modern device in this purpose, number one in the world.

Candela Gentle Max Pro is laser platform with dual wavelength, which combines fast powerful laser with very high performance, efficiency and speed healing, ease of use and safe for patient health. Candela Gentle Max Pro is a system that offers a wide range of treatments:

- Hair Removal
- Wrinkle
- Rejuvenation
- Lift the skin
- Folliculitis
- Tattoo removal...

Beside Candela laser, in MD Vanja's facility, you will get a chance to see one more ultimate device **ND:YAG laser**, which helps in the various derma issues, such as treatment of blood vessels. The radiation of this laser makes it possible to effectively treat enlarged capillaries and small hemangiomas star venous network without damaging other structures. Laser removal of unwanted blood vessels using a unique technology in 1064 YAG laser emits impulses of light energy is absorbed by hemoglobin in the blood. The energy is converted into heat, which leads to blood coagulation and concrete "welding" unwanted vascular walls. This leads to the removal of blood vessels and blood flow on forwarding veins that lie beneath the surface of the skin.

MD Vanja Banicevic is **pioneer in developing modern Cosmetology in Montenegro**, thanks to her experience and all the equipment she has. Beside this, she also does a lot in laser healing of the pigmentation on the skin, removal of the acne, fibroma, papilloma and a full range of other services.

Very important fact is the possibility to buy all the therapy needed when in this hospital. MD Vanja has mixtures of the finest creams made for any derma trouble. All with no paraben and only natural.
