Nkasa Lupala Tented Lodge is built along a channel of the Kwando-Linyanti river system, in a region defined by its seasonal wetland character, where the landscape dramatically shifts between years of plentiful water and those marked by drought.

This seasonal wetland, situated in the Zambezi Region (formerly known as the Caprivi Strip), is commonly known as Mamili and was recently renamed Nkasa Rupara National Park.

The Lodge features ten luxurious tented chalets constructed from steel, canvas, and wood, complete with proper doors and windows and en-suite bathroom facilities. A central main area, housing the bar, dining room, lounge, kitchen, storage, office, and a viewing point, is connected to the guest tents by a network of pathways.

The lodge is entirely self-sufficient for electricity and water heating through the use of solar panels, serving as an exemplary model of sustainable construction and planning not only within the region but across Namibia.

The lodge and the Wuparo Conservancy are integral parts of the successful and award-winning Namibian conservancy program.

At Nkasa Lupala Tented Lodge, prepare to experience a truly sustainable holiday. The lodge is certified and has received a 5/5 rating from the Namibia Eco Awards.

DIRECTIONS: The Lodge is located approximately 75 km from Kongola (on the B8 road) and 130 km from Katima Mulilo.

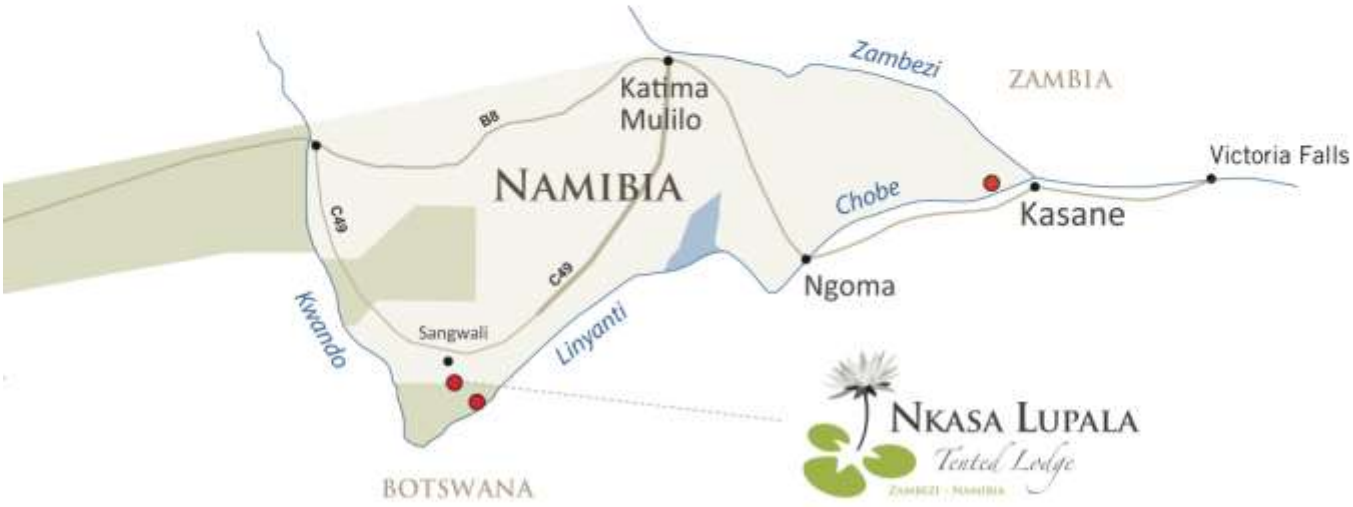

Nkasa Lupala Tented Lodge is accessible only by 4x4 for the final 13km. Guests arriving in other vehicles will find secure parking at the Wuparo Conservancy Office and will be collected by the lodge. A pick-up fee applies, and arrangements must be made in advance, either at the time of booking or by calling the lodge.

The nearest airport is Mpacha Airport (Katima Mulilo), which is 125 km away. FlyNamibia offers regular flights from Windhoek. Kasane and Victoria Falls airports are also viable options.

Nkasa Rupara National Park was officially proclaimed on 1 March 1990, just days before Namibia gained Independence (it was previously named Mamili NP and Nkasa Lupala).

Nkasa and Lupala are the two dominant islands within the park. This is the largest wetland area with conservation status in Namibia and is a haven for wetland species. During periods of high floodwaters from the Kwando River, Nkasa Lupala NP transforms into a mini Okavango Delta.

The Park covers an area of 320 km² and serves as an important corridor for elephants migrating between Botswana, Angola, and Zambia. It is considered a core breeding area for wildlife that can disperse into neighbouring conservancies.
